DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 21, 2003 has been entered.

Response to Argument

Applicant's arguments with respect to claim 1-20 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 10-13 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The specification page 4 paragraph 15 contains language that makes claim 10 non statutory. The term "computer readable medium" as used herein, refers to any medium, signal or carrier that provides information or is useable by a processor(s). This passage of the disclosure presents intrinsic evidence showing that Applicant intends for

the term "medium" to cover something beyond physical articles or objects which are functionally or structurally interconnected with the instructions in such a manner as to enable the instructions to act as a computer component and realize their functionality. Since such a medium, signal or carrier that the term "computer readable medium" referred to may take many forms, including, but not limited to, non-volatile, volatile, and transmission media...Transmission media includes coaxial cable, copper wires and fiber optics, including the wires, i.e., electromagnetic waves that can be modulated, as in frequency, amplitude, or phase, to transmit information signals.

Page 3

Additionally, transmission media can take the form of acoustic or light waves, such as those generated during radio wave and infrared data communications. As such, claim 10 as written and in view of Applicant's disclosure page 4 paragraph 15 is not limited to a statutory subject matter and is therefore non-statutory.

The dependent claims included in the statement of rejection but not specifically addressed in the body of the rejection have inherent the deficiencies of their parent claim and have not resolved the deficiencies. Therefore, they are rejected based on the same rationale as applied to their parent claims above.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 and 10 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 10/743,246 Page 4

Art Unit: 2621

The new added limitation to the claim 1 and 10, means of "first AV program data" and second AV different AV program data" did not find in the specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Ficco et al. (US 2002/0054750).

Regarding claim 1: Ficco et al discloses a method of representing allocation of storage unit capacity within an audio/video (AV) recording device, comprising: identifying a quantity of AV program data stored on said storage unit (paragraph 0100); obtaining a storage schedule for new AV program data comprising of the fist AV program data and the second different AV program data defined over a predetermined time period (paragraph 0105); obtaining a deletion schedule for old AV program data defined over said predetermined time period (paragraph 0116); and producing temporally dynamic indicia representative of allocation of capacity of storage unit over said predetermined time period in response to said quantity of AV program data, said storage schedule, and said deletion schedule (paragraph 0106, 0116 and 0123-0124).

Art Unit: 2621

Regarding claim 2: Ficco et al discloses a method of claim 1, further comprising: displaying a pictorial representation of said temporally dynamic indicia on a display device in communication with said AV recording device (figure 12a-c).

Regarding claim 3: Ficco et al discloses a method of claim 1, wherein step of producing comprises: (a) selecting a time (paragraph 0123); (b) determining a storage configuration of storage unit in response to quantity of AV program data, storage schedule, and deletion schedule at selected time (paragraph 0123-0124); (c) repeating steps (a) and (b) to determine a plurality of storage configurations for a respective plurality of times (paragraph 0123-0124); and (d) combining plurality of storage configurations to form said temporally dynamic indicia (paragraph 0116 and figure 12a-c).

Regarding claim 4: Ficco et al discloses a method of claim 3, further comprising: successively displaying pictorial representations of plurality of storage configurations on a display device in communication with said AV recording device to define a graphical animation (figure 12).

Regarding claim 5: Ficco et al discloses a method of claim 4, wherein graphical animation comprises a pie chart (paragraph 0107 and figure 12).

Regarding claim 6: Ficco et al discloses a method of claim 1, further comprising: modifying a recording configuration of AV recording device in response to temporally dynamic indicia (paragraph 0123-0124 and figure 12); and re-producing temporally dynamic indicia in response to modified recording configuration (figure 12).

Art Unit: 2621

Regarding claim 7: Ficco et al discloses a method of claim 6, wherein step of modifying comprises at least of: increasing compression ratio of an AV program stored on storage unit; and increasing compression ratio of an AV program scheduled for storage on storage unit (paragraph 0006).

Regarding claim 8: Ficco et al discloses a method of claim 6, wherein step of modifying comprises: deleting an AV program stored on storage device (paragraph 0116).

Regarding claim 9: Ficco et al discloses a method of claim 6, wherein step of modifying comprises: archiving an AV program stored on storage device (paragraph 0124).

Regarding claim 10: Claim 10 rejected for the same subject matter as claim 1.

Regarding claims 11-13: Claims 11-13 are rejected for the same subject matter as claim 4-6 respectively.

Regarding claims 14-20: Claims 14-20 are rejected for the same subject matter as claim 1-2 and 5-9 respectively.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DANIEL TEKLE whose telephone number is (571)270-1117. The examiner can normally be reached on 7:30am to 5:00pm M-R and 7:30-4:00 Every other Friday..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha D. Banks-Harold can be reached on 571-272-7905. The fax phone
